Umut Deniz Darendeli - Full Stack Developer

SKILLS

Highly experienced in React, Redux, Zustand, writing backends in Next.js and Node, using various databases, SQL, ORM and CMS solutions. I also like to work with data, write computer games in Unity and solve coding challenges.

EXPERIENCE

Alyo Software, Ankara – *Fullstack Engineer*

JAN 2023 – JUL, 2023

- I was responsible for bug fixing, feature development, and Frontend component creation.
- Practiced on fundamental technologies such as JQuery and PHP, Translated PHP routes into HTML-JS interfaces.
- My main project was to implement the monitoring interfaces for the server status. Calculating, graphing and visualizing server condition for selected time periods, using the generic metrics such as packet loss, bitrate and more.

Micazook, Wrocław – *Fullstack Developer Intern*

MAY 2019 – OCT 2019

- Within my team; developed, deployed, and maintained web applications.
- Worked to solve complex bugs and structural problems using our own vanilla javascript component library and dev-ops frameworks.
- Served as a professional intern in a fast-paced environment.
- Had a chance to learn from the senior engineering team about many details of the fullstack development work.

More Available Upon Request

EDUCATION

Technical University of Wrocław – *Bachelor's*

SEP 2019 – JUNE 2022, WROCŁAW

Studied Computer Science extensively in PWr, mainly learned about Web Development, Game Development, Network Management and Data Science.
